

MINI DVR how to take photo

Plug in camera, setting the recording setting.

Select the mode

Select the photo mode

Take photo could auto or manual

Setting time : 1 means 1 second
Then return to camera mode like below:

If select manual mode, take the button to Rec position, the dvr has take one photo,
Then take the button to Stop , going on taking to Rec, the dvr has taken the second photo.and so on.

If select auto mode , take to Rec position ,then the dvr would take photo automatically in every setting time.

When the dvr is taking photo, the icon would turn red, if it continue to turn white, it means it is ready to take next photo
